PROJECTS

Dashmaps – Mobile Navigation Engine | *React Native, Expo, Appwrite Cloud, OpenRouteService API* Work in Progress

- Designed a high-performance mobile navigation app using a micro-payload architecture to proxy routing requests through Appwrite Cloud Functions, optimizing payload size via compressed Encoded Polyline.
- Integrated live geolocation tracking, interactive map view controls, and secure user authentication with a focus on UI/UX polish and offline resilience.

Legal RAG – Intelligent Document Q&A System | *Python, LangChain, Vector Database, LLM APIs* Work in Progress

- Developing a Retrieval-Augmented Generation (RAG) system to query and summarize complex legal documents, enabling accurate semantic search and context-aware responses.
- Implementing vector embeddings and chunking strategies to extract relevant legal precedents and streamline document analysis workflows.
